Free AuthPoint MFA for 60 Days
# Up to 250 Users
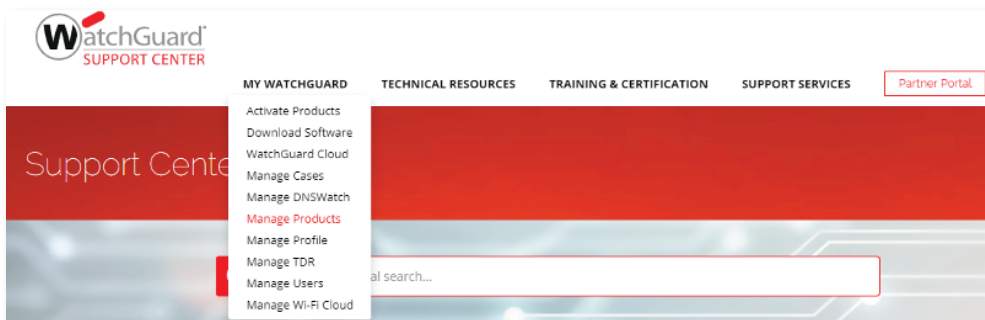

Provide your clients with 60 days of free AuthPoint MFA

1 Activate AuthPoint.

Our trials are a fast and easy way to provide customers free access to AuthPoint MFA so they can protect remote employees during a disruption like the coronavirus (COVID-19).

a.   Go to watchguard.com and log in, then click **Support Center**.

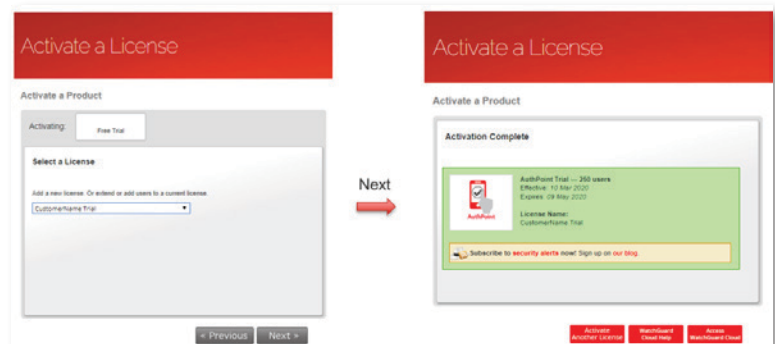

b.   Select **My WatchGuard** > **Manage Products**.

c.   Click **WatchGuard AuthPoint** and then click **Free 30 day trial**.

d. Name your trial license, then review and accept the End User License Agreement to finish. You're now ready to configure AuthPoint and protect your users!

e. **BONUS:** Add 30 days to your customer's AuthPoint trial. To do this, repeat the steps above and on the **Select a License** page of the activation wizard, select your customer's trial license.

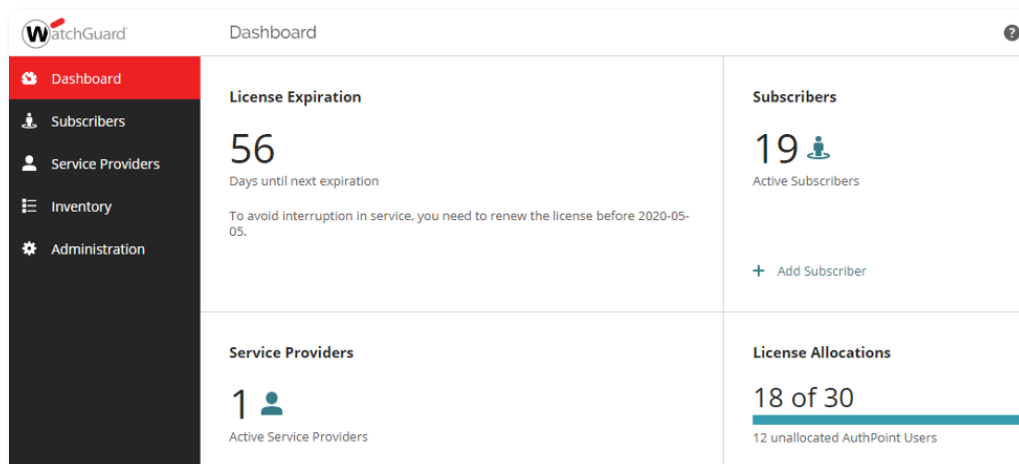

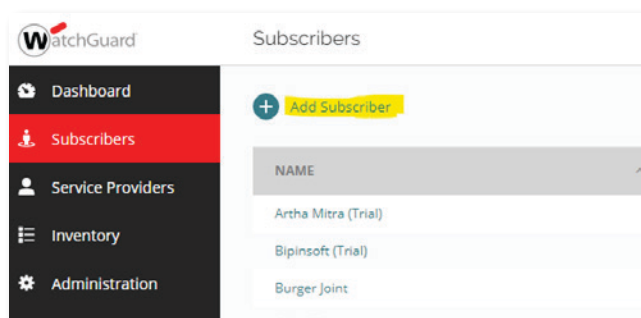

f.

2 Create a Subscriber Account for Your Customer

a. Log in to WatchGuard Cloud at https://cloud.watchguard.com

b. From the navigation menu, select **Subscribers**. Then click **Add Subscriber**.

c. Enter an **Account Name** (usually the name of the customer) and fill out the rest of the fields.

   i. Add the contact information for the customer or partner who manages the account.

   ii. To grant someone access to this account, click **Add Operator**. This is not necessary if you intend to configure and manage their account and services for them.
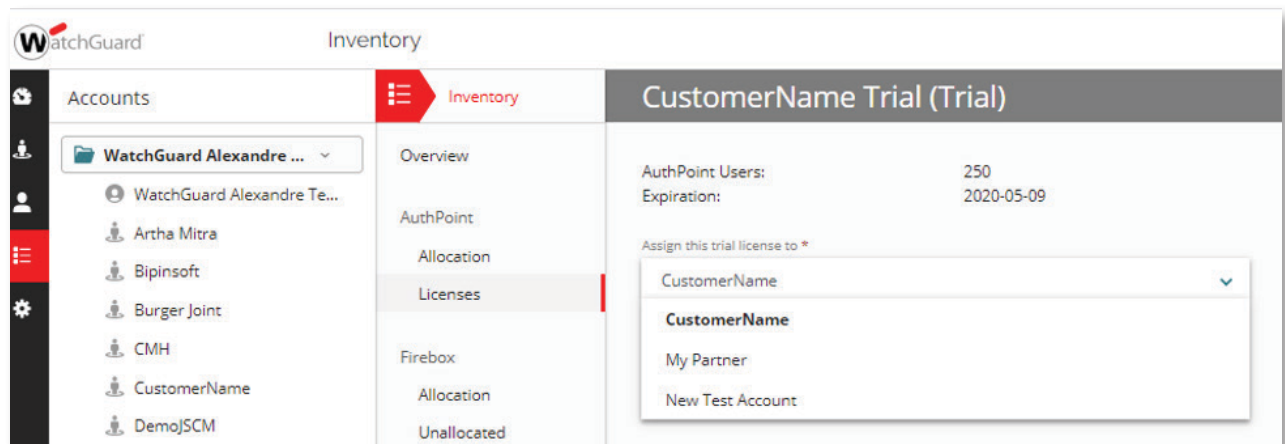

d. Click **Save Account**.

3 Assign the Trial License to the Customer's Account.

a. Select **Inventory**.

b. In the **Inventory** menu, select **Licenses** (under AuthPoint).

c. Select the trial license you created for the customer.

d. From the **Assign this trial license to** drop-down list, select the account you created. Click **Save**.

4 Set Up AuthPoint!

a. From the navigation menu, select **Subscribers**. Then click on the name of your customer's account to log in and configure AuthPoint MFA for them.

b. If you added an Operator to the account, remind them to look out for a confirmation email from WatchGuard so they can create a password and access their AuthPoint account at https://cloud.watchguard.com

Start using AuthPoint now at https://cloud.watchguard.com

To learn how to set up and deploy AuthPoint, see the AuthPoint Deployment Guide
