

UUSI Microsoft Dynamics 365 Business Central (ex. Dynamics 365 for Finance and Operations) lisätty Microsoft CSP-malliin

Dynamics 365 Business Central on kattava liiketoimintaratkaisu, joka on helppo ottaa käyttöön ja mukauttaa. Sen avulla voi yhdistää liiketoimintaa ja tehdä älykkäitä päätöksiä.

Dynamics 365 Business Centralista löytyy kaksi eri versiota: Essential ja Premium

Essential includes:

- **Financial Management**, including general ledger, workflows and audit trails, bank management, budgets, deferrals, bank reconciliation, dimensions, fixed assets, and currencies
- **Customer Relational Management**, including contacts, campaigns, opportunity management, and built-in integration with Dynamics 365 for Sales
- **Supply Chain Management**, including sales order management, basic receivables, purchase order management, locations, item transfers, and basic warehousing
- **Human Resources**, including employees and management of their expenses
- **Project Management**, including resources, estimates, jobs, and time sheets
- **Other**, including multiple languages, reason codes, extended text, Intrastat reporting, scheduled tasks, and integration with Outlook

Premium includes following functionality, in addition to what's offered in Essential:

- **Service Order Management**, including service orders, service price management, service item management, service contract management, planning and dispatching
- **Manufacturing**, including production orders, version management, agile manufacturing, basic supply planning, demand forecasting, capacity planning, machine centers, and finite loading, bringing the full breadth of the popular Dynamics NAV application to the cloud.
